

Sept., 24<sup>th</sup>. 1927.

Allen-Bradley Co.  
286 Greenfield Ave.,  
Milwaukee, Wis.  
Gentlemen;

The Milwaukee Radio Amateurs Club Inc., will as usual have a prominent booth at the coming Radio Show to be held in this city on the 4<sup>th</sup> to the 6<sup>th</sup> of October. This will consist of a complete HAM station with a 150 Watt Transmitter and a Short Wave Receiver operating on 40 meters, with the usual free message service to all, and will be on the air about 8 hours daily.

The club will be pleased to exhibit any parts of your manufacture that can be used in the construction of such a station and which you find it possible to donate for that purpose. These receivers and the transmitter will be installed in the clubs rooms and used at later shows. We would be particularly interested in obtaining one of your power filament rectifiers.

Our booth created quite a good deal of interest at the last show as you probably know. The Eveready Battery Co. who so kindly donated the 1000 volts of "B" batteries last year, used a full page cover ad in QST in relating our activities at that time.

Thanking you in advance for any favors you may find it possible to bestow on us, we are,

Yours Very Truly,

The Milwaukee Radio Amateurs Club Inc.

Secy., Treas.
